COMMERCIAL FIRE PROTECTION ·

EST. 2012

TAURANGA, NZ

NEW ZEALAND OWNED. *BUILT ON GETTING IT RIGHT.*

Ultrafire is a wholly New Zealand owned fire protection and building compliance company. We have protected commercial and industrial buildings since 2012, working from our Tauranga base across the North Island.

We design, install, service and certify fire systems — the full life cycle, under one roof. One team is accountable for your building's protection, from the first drawing to its annual Building Warrant of Fitness, and one point of contact who actually knows your site.

We work alongside developers, main contractors and building owners to deliver systems that are compliant, cost-effective and built to last. No job is too large or too small, and every client gets the same attention to detail.

04 Fire equipment installation & testing

05 Fire doors & passive fire systems

06 Fire extinguishers

07 Gas suppression systems

08 Hydrants & hose reel systems

09 Emergency lighting

10 Emergency warning & evacuation systems

11 Special application systems

12 Service, maintenance & compliance testing

▶ A FULL LIFE-CYCLE APPROACH

From design through to ongoing compliance, we stay with a building for its whole life. That continuity is what keeps systems compliant and councils satisfied, year after year.

LOCAL TEAMS

Skilled people based where the work is — locally and nationwide.

LEADING TECHNOLOGY

Design, installation and service of the industry's most advanced fire systems.

EXPERT ADVICE

Consultancy across the board, from engineering design to fire training.

LONG-TERM PARTNERSHIPS

We look after as many of your building services as you need — continuity you and your council can rely on.

OUR TEAM

**KRIS TOCKER**

DIRECTOR

Owner and founder, with more than 25 years in fire protection. Kris started in the industry in 1997, learned every part of it, and launched Ultrafire in 2012. He has built the company on delivering large, complex installs on time — and is still on site with the team.

**MIKE WOOD**

OPERATIONS MANAGER

Highly regarded across the fire industry, Mike runs our contracts and installations with a process-driven approach that shows in every finished project. With 20 years' experience, he sets the standard for service and keeps the team running smoothly.

**JOE MEDWIN**

SPRINKLER DESIGNER

Our senior designer brings 15 years of experience and deep knowledge of fire system design and legislation. Joe specialises in quality, cost-effective, fully compliant systems and is a proficient user of Revit, AutoCAD, AutoSprink and BIM360.

A selection of the developers, contractors and building owners we partner with across the North Island.

IN PROGRESS • CLIENT: HONEYWELL

SKYCITY AUCKLAND

Full site fire system upgrades across a precinct that never closes. The Sky Tower runs seven days a week, the hotels have guests asleep in them and the casino floor doesn't shut — so every zone is planned so the building stays protected the whole time. It's the largest single body of work we hold.
